Company Profile

Winner Electronics Limited is a Shenzhen high-tech enterprise, which specializes in all kinds of LED displays and LED lighting products, including research & development, design, production, sales and after-sales service.

Our production base covers an area of 15,000m². Our factory is equipped with full-automatic machines, automatic welding lines, reflow soldering machine, wave soldering machine, automatic glue-filling machines, LED module high-temperature aging area, waterproof test pool, automatic packaging lines, and automatic-aging production lines and so on. Our monthly production capacity exceeds 3,500m². Our market covers more than 50 countries and regions.

We strive to put our customers need first and promote quality in every LED product that Winner builds. Stressing high quality, Winner uses high quality extruded aluminum, heat resistant sun shades, best quality power supply, and other top-quality parts to build a truly high quality LED product.

We strictly comply with the requirements of 7S, ISO9001-2008 and ISO14000 system!

LED BLUETOOTH DISPLAY

MONO / TRI- / FULL COLOR

LED Display Solution

NEW arrival

Key Features

- Wireless connection with bluetooth technology
- 8 font styles in Song, Tranl, Japan, Fsong, Kaiti & Yyuan
- Memory storage upto 8 messages, totally 640 characters
- 8 display speeds and 8 display transition methods
- Support multiple units connection
- Low working votages, ranging from 5-12VDC
- Quality durable frame
- Slim design and light weight
- High bright with illumination adjustment for semi-outdoor use
- Easy to install hardware

Advantage

Ad|Runner OUTDOOR FULL COLOR LED Display Solution

NEW arrival

Key Features

- Deliver real time dynamic messages
- Aluminum housing to minimize weight while ensuring a solid construction
- Optimal intensity and legibility in the daytime and night (3,800 Nits)
- Wide Viewing Angle, 160 horizontal degree
- Controlled by 3G internet or SD card storage
- Multiple taxi displays' connection to center server automatically
- Low power consumption but coming with over 100% brighter advertisement

Ad|Runner in Turkey

Ad|Runner LED Taxi Top Display OUTDOOR FULL COLOR

Ad|Runner is changing the landscape of outdoor advertising. Now advertiser can deliver real time dynamic campaigns that reach their target customers where they live, work and play.

Utilizing 3G technology, advertisers can target audiences in an entire city, neighborhood, or on a single city block and change their message by the second, on hundreds of mobile electronic billboards mounted on taxis.

Specification

Item	Ad Runner Taxi Top Display
Pixel Configuration	SMD 3-in-1 LEDs
Physical Pitch	6mm
Cabinet Physical Reso.(WxH)	160 x 64 /dots, x 2 sides
Cabinet Dimension (WxH)	960 x 288 /mm, x 2 sides
Protection Level	IP65, Fully Outdoors
Weight per Cabinet	27kgs
Physical Density	40,000 pixels /m2
Brightness before Calibration	> 3,800 Nits
Brightness after Calibration	> 3,500 Nits
Color Temperature	3200K - 9300K, adjustable
Horizontal Viewing Angle	160°
Vertical Viewing Angle	160°
Max. Power Consumption	700W
Avg. Power Consumption	350W
Power Supply	12VDC - 36VDC
Flash Memory	500M, extendable
Support Format	JPG, BMP, PNG, AVI, WMI, MPG, MOV..
Communication Interface	3G Wireless via Internet
Grayscale Level	14-bit
Driving Mode	1/4
Frame Rate	>60Hz
Refresh Rate	>1140Hz
Lifetime (half brightness)	100,000 hours
Lifetime (full white)	50,000 hours
Operating Temperature	-20°C - 50°C
Operating Humidity	10 - 90%RH

VMS OUTDOOR MONO COLOR LED Display Solution

NEW arrival

Key Features

- Extruded aluminum cabinet
- Full matrix display - available in a number of different sizes
- Ultra-bright LEDs of long work life
- Character size, configuration and mounting options
- Fully programmable - can display an infinite number of traffic symbols and text displays
- Cost effective, lighter in weight and easy maintenance
- Running for 24 hours after fully charged
- Fix and mobile applications
- Wireless programmable via built in SIM card
- IP65 protection level

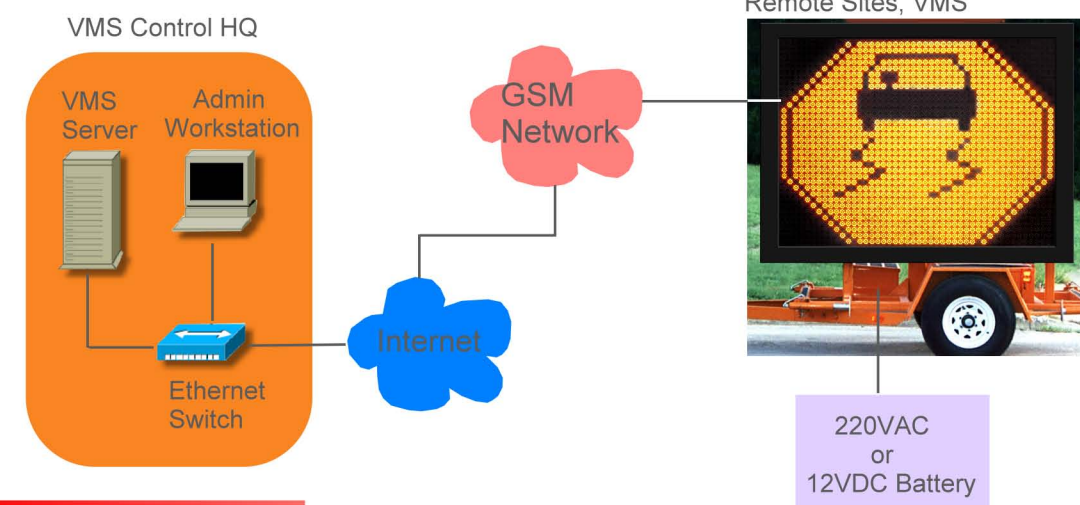

Movable LED VMS Trailer

VMS Variable Message Sign OUTDOOR MONO COLOR

Variable Message Sign (VMS) is a unique and innovative method of enhancing effective and useful light, developed by Sirius HK Limited. By applying a patented process to a high-intensity LEDs for traffic information to improve road safety where it wasn't possible before.

Its output is more consistent than cluster LEDs, not subject to degradation, easier to maintain, significantly reliable and cheaper to run.

LDD WINDOW HIGH BRITE LED Display Solution

NEW arrival

Key Features

- Compact & robust design
- Aluminum housing to minimize weight while ensuring a solid construction
- Flat design reduces the external dimensions to a minimum
- UV protection
- Viewing angle of approximately 110 degree to optimise and legibility
- Capable of multi line display and graphics import
- Reduce life cycle cost
- Maintenance free

LDD LED Destination Display WINDOW HIGH BRITE

The LED Destination Display has an unparalleled visual impact. Through high definition characters, 120 degree horizontal visibility, and automatic brightness control, the displays are easily visible day and night and in many weather conditions.

They are built to be both lightweight and inexpensive to maintain due to the elimination of moving parts and the long life of LED.

Mechanical Diagram

Specification

Item	LDD-1000W-16x96A
Voltage	12VDC - 36VDC
Current Consumption	12V @4A or 24V@2A
LED's	5mm Amber
Resolution	16H x 96L /dots
Overall Dimension	190H x 1000L x 50D /mm
Weight	6 kgs
Brightness	> 3500 CD/m2
Viewing Angle	110°
Text Transfer	SD, Memory Card
Transfer Speed	Varies with number of destinations, e.g: 1,000 destinations in appro. 15 seconds
Keypad Programming	For Emergency Message Only
Fonts	Dot Big Bold, Dot Italic, Dot Small Bold, Dot Small ...upto 25 fonts
Graphic / Logo	Edit by PC user friendly software
Memory	Flashrom, 1,000 messages
Display	Graphic LCD, routes' selection
Ambient Environment	-20 to 70° C
Humidity	< 93% RH at +40° C
Vibration, Shock	EN 50155:1995, EN661373

BWL

CUSTOM PROGRAMMABLE LED Display Solution

NEW arrival

Key Features

- 48 LEDs & 48 patterns colorful double-side display
- Display your own graphics from USB interface
- Running at speed of 5km/h, and full screen displaying at 15km/h
- Waterproof & shockproof
- Built-in high speed CPU and level-off sensor, intelligent control
- Simple installation and removal
- AAA batteries x 3pcs, working for 20 - 30 hours
- Fully outdoors with IP55 international housing standard
- For 22-inch wheels or above

BWL Bicycle Wheel Light

CUSTOM PROGRAMMABLE

The Bicycle Wheel Light (BWL) has 2 bars of LEDs which are attached together inside your wheel. As your ride the system rotates, using our user friendly software to create an image with its 48 color LEDs.

The BWL has sensor to track its speed, heads-up position and rotation direction. It allows the system to create stable, full-wheel images from 15 to 65 km/h.

Installation

Install in the middle of groove on the bicycle axle

Fixed to two head, pressure a bit and make it more strong

Plug in AAA batteries, x 3pcs

Ultrahigh Brightness

Network Remote

Low Power Consumption

Auto Dimming

Maintenance Free Low Cost

Weatherproof

Specification

Item	BWL-22RGB
Processor	Embedded ARM Processor
Sensor	Position Sensor
No. of LEDs	48 pcs
Display Range	Both sides
Speed Requirement	Full Screen Display @15km/h
Color Pattern	Red, Green & Blue, 48 colors
Communication Interface	USB
Text & Graphics	Supported
Voltage	3.0 V- 5.0V
Current	35mA
Rotating Speed	Automatically Controlled By Built-in Position Sensor
IP Standard	IP55, Outdoors
Applicable	AAA, x3pcs
Type of Wheel	22-inch or above
Windows	Microsoft Windows XP & Windows 7
Weight	150 grams
Overall Dimension (LxHxD)	442x58x27 /mm
Smart Switch	LEDs On / Off Automatically
Manual Switch	To Save More Power

OUTDOOR MONO COLOR

LED Display Solution

NEW arrival

Key Features

- Display format available in 8.888, 888.8, 8.889 & 888.8
- Light-weight, high-tech, durable extruded aluminum case
- Low power consumption
- Uncompromised day light visibility, 3000 Nit brightness rating
- Ultra wide 140 degree viewing angle
- Front-serviceable
- LEDs rated at 100,000 hours
- Auto-night dimming (optional)
- Plug & Play one step installation
- IP65 international housing standard

LED Gas Pricers in Red, Amber, Blue & White

Specification

Item	L.E.D. Gas Pricer
Color	Red, Amber, Green, Blue or White
Digit Height	4", 6", 8", 10", 12", 16", 24", 36", 40", 48", 60", 72"
Digit Design	Standard Digit: 4", 6", 8", 12", 16" 24" and above are multi-stroke seven segment digits
Brightness Control	Auto dimming by sensor
Display Dimming	4 levels of brightness adjustment, automatically
Viewing Angle	140 horizontal degree
Service Access	Front or rear access
Master / Slave	Single / Double side, mater / slaves available
Housing Material	Extruded aluminum
IP Standard	IP65 Front & IP54 Rear
Drive Mode	Static constant current
Power Input	110 / 220 VAC, 60 / 50Hz
PC Communication	RS232 / RS422
Communication Distance	LAN, GSM Modem, RF Modem, SMS (optional) Max. 15 meters for RS232 & 1200 meters for RS422
Remote Control	RF remote control
Continuous Working Time	Unlimited
Lifetime of LEDs	>100,000 hours
Installation Method	Hanging & mounting
Working Temperature	-20°C - +60°C

HF OUTDOOR FULL COLOR LED Display Solution

Key Features

- From physical pixel pitch of 10mm to 31.25mm or virtual pitch from 5 to 15.6mm
- Unique intelligent design records the brightness and chrominance of each LED lamp, thus ensuring the uniformity and consistency of the overall display image
- Dual directional signal feed and auto inspection of transmitting direction
- Adjustable constant current source without compromising on the grayscale, resulting in optimal pictures under any kinds of brightness environment
- 16-bit color processing and super high refresh rate over 3,840Hz provide stunning flicker-free broadcast video images
- IP 65 front and IP43 rear protection

MF Mesh & Fix Installation OUTDOOR FULL COLOR

The MF series inherited thin and see-through from features of traditional curtain. Based on mater-piece structure, advanced electronic & electrical circuit design was adopted to built a luminosity of 5,000 - 8,000 nits.

See-through makes it low-windage and IP68 ingress protection makes it stand well in adverse weather condition.

Mechanical Diagram

- Ultrahigh Brightness
- 120° Wide Viewing Angle
- Remote Control & Scheduling
- Uniform Color
- Flicker-Free
- User-Friendly Software

Advantage

MF OUTDOOR FULL COLOR LED Display Solution

Key Features

- Unique soft LED strip suits any surface profile or shape
- See-through & low weight
- High refresh rate and low power consumption
- 16-bit color processing and high refresh rate provide stunning flicker-free broadcast video images
- High brightness & excellent display
- IP68 protection level

Aging test in progress

Specification

Item	MF50	MF 25/50
Pixel Configuration	2G2G2B	2G2G2B
Physical Pitch	50mm	25H / 50Vmm
Physical Density	400	800
Brightness	>4500 CD/m2	>7500 CD/m2
Length of Strip	2000mm	1500mm
Matrix of Strip	40 dots	60 dots
Max. Power Consumption	200W/m2	535W/m2
Horizontal Viewing Angle	120 degree	120 degree
Vertical Viewing Angle	60 degree	60 degree
Weight per Strip	1.2 kgs	0.9 kgs
Protection Level	IP68	IP68
Cabinet Dimension	2000X1600mm	1500X1600mm
No. of Strip / Cabinet	32	32
Cabinet Resolution	40x32	60x32
Weight, kg/m2	28	30
Transparancy	50%	50%
Housing Material	Steel	Steel
Color Temperature	3200 - 9300K adjustable	3200 - 9300K adjustable
Power Supply	AC220V/50Hz or AC110V/60Hz	AC220V/50Hz or AC110V/60Hz
Signal Processing	14-bit	14-bit

IR INDOOR FULL COLOR LED Display Solution

Key Features

- Light weight, thin and slim, easy to carry and install
- Natural heat dissipation for the whole LED panel. The main structure is constructed by Aluminum which has high coefficient of heat conductivity
- No fans and air-conditional system are required for cooling
- High refresh rate and low power consumption
- Fast clamp lock helps fast installation, small seam between adjacent cabinets and high connection accuracy
- The LED panel is equipped with PSU but no fans, so no noise occurred when running
- Integrated design for the cabinet
- IP31 protection level

MR SEMI-OUTDOOR FULL COLOR LED Display Solution

Key Features

- Light weight, thin and slim, easy to carry and install
- Natural heat dissipation for the whole LED panel. The main structure is constructed by Aluminum which has high coefficient of heat contivity
- No fans and air-conditional system are required for cooling
- High refresh rate and low power consumption
- Fast clamp lock helps fast installation, small seam between adjacent cabinets and high connection accuracy
- 16 bit color processing and high refresh rate provide stunning flicker-free broadcast video images
- IP54 protection level

...More LED Products....

INDOORS, SEMIOUTDOORS & OUTDOORS

Elinker

- Simple to use / 12VDC operation
- DIY easy installation, no screws or tools required
- Fast, Slow & Mirror scroll modes
- Smart IR sensor allows remote control programming
- Adjustable viewing angle 360°

LED Limo Sign

- High bright L.E.D. to draw others' attention easily
- Rechargeable battery last for 4 hours
- Programmable by remote keypad
- Speed / brightness adjustment
- Store upto 20 messages in total

LED Name Tag

- Compact / Slim Design
- Program upto 255 characters per message
- 17 kinds of moving ways
- PC download (USB or RS232 interface)
- Attaches using micro-magnet

LED Writing Board

- To write anything you want by regular marker pen
- Text Erasable
- Low power consumption
- Colorful Writing
- RGB LEDs as back light

LED Time & Temperature Display

- High Bright LEDs (Red or Yellow) from Taiwan
- Easy installation / operation
- Programmable by remote
- IP65 housing for outdoors
- Auto dimming at Day / Night

LED Call-A-Number Display

- Easy installation / operation
- High bright LEDs for either indoors or outdoors
- Keypad operation
- Maintenance free
- Wide viewing angle 160 degree

LED Colorful Strip

- Wide range of color temperature
- Changing mode / display mode with controller
- Fully cut / connection accessories
- Lower power consumption
- 12VDC operation (220VAC optional)

LED Keyboard Display

- Keyboard direct programming
- Over 10 kinds of display functions
- 4 fonts and built-in clock function
- Vertical & horizontal auto displaying
- Store upto 12 messages

...More LED Products....

MONO COLOR, TRI-COLOR & FULL COLOR

LED Digital Board

- Program by USB interface & battery rechargeable
- Support TXT, JPG, BMP, PNG..etc files
- 30 kinds of built in animations
- Store 8 messages and 6,000 characters in total
- Brightness adjustment from 25% to 100%

LED Module

- Pitches available in P4, P5, P6, P10, P16, P20...
- Single color, tricolor & full color
- Fully outdoors with IP65 on the front
- Ultra bright / stable LEDs for operation in 10 years
- Quick delivery in 10 days

LED License Frame Plate

- Running automatically when power on
- Low power draw (200mA) from 12VDC operation
- Remote programmable, max. 5 messages
- Color available in Red, Blue, Amber, Green, White
- Ultra SMD LEDs to ensure high visibility displaying

LED Traffic Display

- Ultra bright LEDs for day time viewing
- Wireless communication, max. upto 800 meters' dist.
- IP65 housing in aluminum material
- Networkable and scheduling
- Low power consumption, 100W /m2

OPEN Panel

- Super bright & wide viewing angle LEDs
- Low power consumption, 10W max.
- ABS housing / light weight
- Standard Voltage: 110VAC or 220VAC
- Maintenance Free & no cost for repairing

LED Pharmacy Sign

- Single color, tricolor & full color available
- Programmable by PC software supplied
- Ultra bright LEDs for completely outdoors
- IP65 housing in aluminum material
- Easy installation & operation

LED "FULL" Display

- Easy installation and operation
- Dry contact for on/off display
- High bright LEDs for outdoors
- Wide viewing angle, 120 degree
- Custom made size & flashing effect

LED Traffic Light (OEM)

- 200mm diameter PCBs
- 90pcs of LEDs for both RED / GREEN lights
- 12VDC low voltage operation
- Dry contact for on/off
- Superior brightness; R: 5000mcd & G: 6500 mcd

About LED Display Technology

What is an LED?

LED stands for Light Emitting Diode. Basically semiconductor chips that produce light, LEDs are much different and far more efficient than incandescent light bulbs. They consume far less electricity, requiring only 1/10 to 1/40 the energy of incandescent bulbs. While light bulbs burn out relatively quickly, LEDs can last for more than 100,000 hours.

What is a Pixel?

A pixel is a cluster of two or more LEDs, each delivering a single point of light or color. Monochrome signs use pixels that are clusters of single colored LEDs. A pixel in a color sign combines red, green and blue LEDs (which is why color displays are sometimes referred to as RGB displays). Arranged in rows and columns, thousands of pixels go into every LED sign.

What does "pitch" mean?

The pitch of an LED sign is the distance between each pixel. If a pitch is 16mm, that means that each pixel (or LED cluster) is 16 millimeters apart. Smaller numbers mean a "tighter" pitch.

The closer the pixels (or the tighter the pitch), the crisper and more realistic your image appears, especially when viewed from shorter.

LEDs and Viewing Angle

Viewing Angle refers to the angle from which an LED display is seen by passers-by. When you look at an LED straight on, it is at full brightness. As you view the LED from different directions, the brightness changes and the image becomes less clear. This is typical for all LED signs, but some have a wider viewing angle, allowing you to see more of the image.

Resolution

Resolution is the overall number of pixels in a display, usually defined in terms of vertical and horizontal components. The higher the resolution, the better the picture quality.

Selecting the Right Electronic Display

Viewing Distance & Time?

Understanding viewing distance and time will help you determine the correct size of your electronic sign.

Text or Graphics?

Ideally, everyone wants to run graphics and dazzling animation on their electronic sign to attract lots of viewers. In fact, it is really not necessary if your screen is used to show, e.g: financial information, community announcements, upcoming events...etc.

Text Display

Graphic Display

Message Content (Lines or Text and Resolution)?

How much content you want to display on your electronic sign at once. LED signs give you the flexibility of displaying multiple messages by cycling through the messages at a delayed interval. Resolution is another factor you need to consider. Usually, higher the number of pixel, higher the resolution.

Multilines Display

High resolution vs low resolution

Physical Size of Electronic LED Display?

We can modify our standard models or custom build electronic sign systems to suit your needs.

2x2

3x3

4x4

Other Factors to Consider?

We have covered the basic factors you need to consider when selecting an electronic sign. There are other factors that you may need to take into consideration. Please feel free to contact us and we will be glad to explain it to you.

Installation for LED Displays

I) Regular Installation

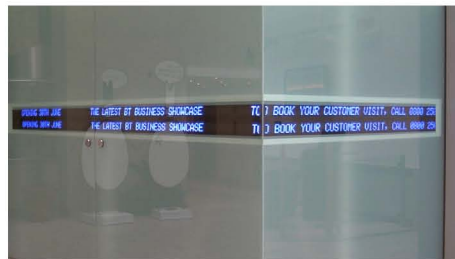

Pole Mounting

Wall Mounting & Front Access

Hanging on Ceiling

Fixed to Wall

Support with Pilar

Stand on Ground

II) Installation On Top Of Building

Front View

Rear View

III) Putting Up the LED Video Display in Stadium

Prepare the main structure

Assemble module by module

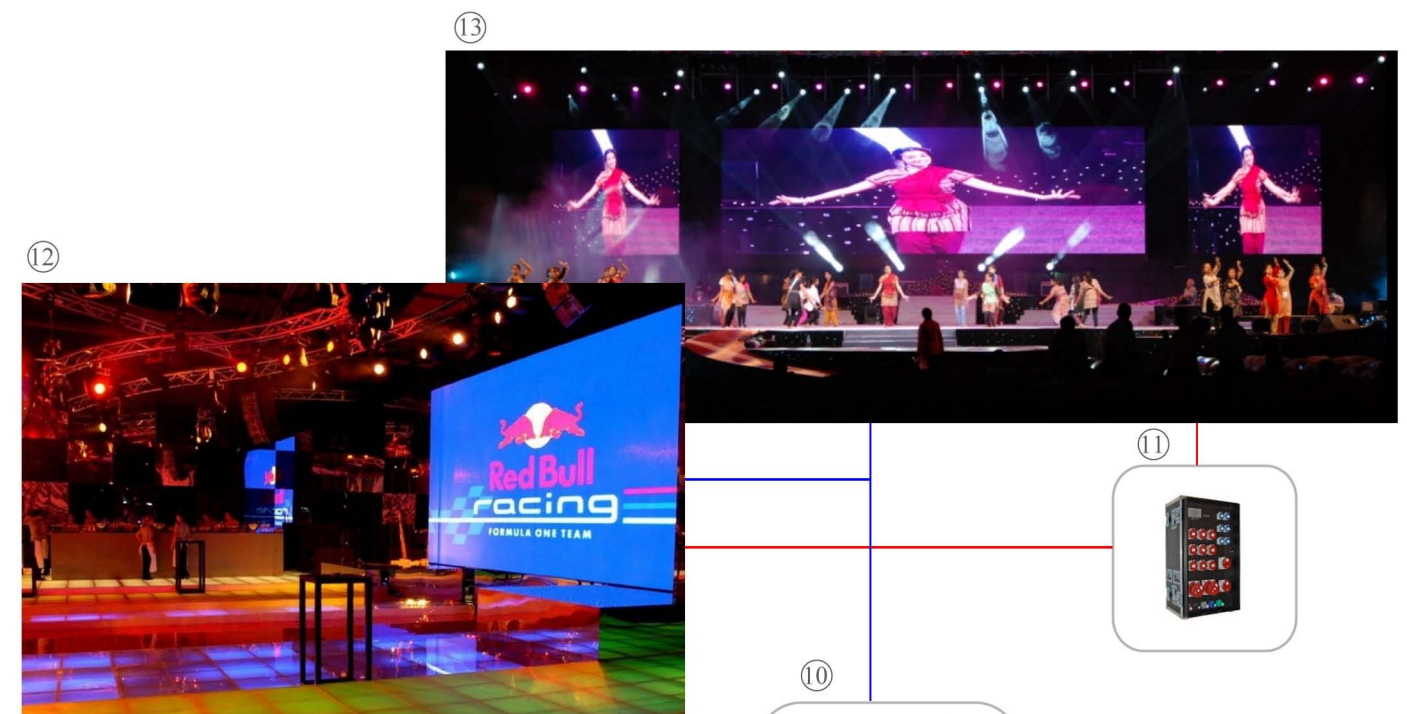

Lift up the screen in position

Powe on and turn on the display
